In December, 256,500 unemployed jobseekers

Unemployed jobseekers' percentage of the workforce by ELY centre

AE Employment Service Statistics / Ministry of Economic Affairs and Employment, Employment Service Stats

A total of 256,500 unemployed jobseekers were registered at the Employment and Economic Development Offices at the end of December. This is 39,000 less than a year earlier. The number of unemployed jobseekers increased by 27,100 from the previous month. The increase in unemployment in December is a phenomenon occurring each year due to graduations from certain vocational education institutions, increases in lay-offs and a higher than normal number of fixed-term employment contracts ending during December. Unemployed jobseekers accounted for 9.7% of the labour force, which is 1.5 percentage points less than a year ago.

In 2018, the average number of unemployed jobseekers was 255,900, or 47,500 less than the year before. Unemployed jobseekers accounted on average for 9.7% of the labour force in 2018, which is 1.8 percentage points less than a year ago. The figures are from the Employment Service Statistics of the Ministry of Economic Affairs and Employment.

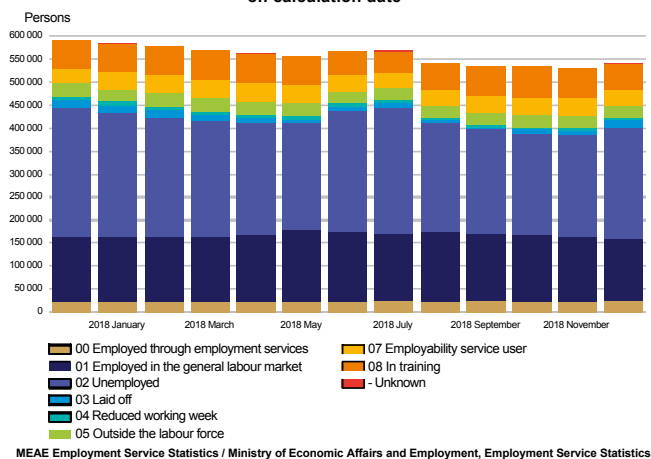

Trends:

Information about the website

On this website you will find the latest statistics from the Ministry of Economic Affairs and Employment's monthly Employment Bulletin. You can access a .pdf version of the current and previous months' Employment Bulletin by following the link on the right. The Employment Bulletin is based on the data from the MEAE's Employment Service Statistics. The Ministry of Economic Affairs and Employment compiles statistics on the clients of the Employment and economic development offices (TE offices), including registered job-seekers, labour market policy services, and job vacancies reported to TE offices by employers. The data is collected from the customer service registry (URA) used by the TE offices. This means that the data used by MEAE Employment Service Statistics is completely registry-based. The statistical data covers all persons, services, and open vacancies in the aforementioned groups, as separately defined in the registry by the classifications and variables for the statistical period in question. The figures also include registered jobseekers who are taking part in local government trial schemes for promoting employment.

Owing to seasonal variations, the Employment Bulletin always includes a comparison with the corresponding month in the previous year. The descriptors used in the Bulletin are also available in a table format. The Employment Bulletins are published at the end of the subsequent calendar month. The official date of publication is announced in advance.
