Decrease in unemployed jobseekers in June

At the end of June, the number of unemployed jobseekers registered at the Employment and Economic Development Offices totalled 254,200, down 18,600 on the previous year. Compared with May, the number of unemployed jobseekers increased by 27,600. Typical of the summer period, the increase was brought about by the entry into the labour market of the young graduates from various education institutions and termination of certain fixed-term employment contracts for the summer months. The termination of fixed-term contracts in summer increased unemployment particularly among women. Women's unemployment increased from May by 21,000.

In June, 9,500 of unemployed jobseekers were fully laid off, which is 1,100 more than in May. Since June last year, the number of people fully laid off has increased by 100.

The number of foreign citizens among unemployed jobseekers totalled 29,500, down 1,000 from June a year ago. Of these foreign unemployed jobseekers, EU/EEA citizens accounted for 7,400 at the end of June, down 500 from the year before.

Information about the website

On this website you will find the latest statistics from the Ministry of Economic Affairs and Employment's monthly Employment Bulletin. You can access a .pdf version of the current and previous months' Employment Bulletin by following the link on the right. The Employment Bulletin is based on the data from the MEAE's Employment Service Statistics. The Ministry of Economic Affairs and Employment compiles statistics on the clients of the Employment and economic development offices (TE offices), including registered job-seekers, labour market policy services, and job vacancies reported to TE offices by employers. The data is collected from the customer service registry (URA) used by the TE offices. This means that the data used by MEAE Employment Service Statistics is completely registry-based. The statistical data covers all persons, services, and open vacancies in the aforementioned groups, as separately defined in the registry by the classifications and variables for the statistical period in question.

Owing to seasonal variations, the Employment Bulletin always includes a comparison with the corresponding month in the previous year. The descriptors used in the Bulletin are also available in a table format. The Employment Bulletins are published at the end of the subsequent calendar month. The official date of publication is announced in advance.
